CENDYN®

eMenus & Hyatt

Manage specialty, catering and event menus with ease

Cendyn's eMenus is an ideal way to showcase food and beverage options with online menus aimed at both group and social events. eMenus for Hyatt is a fully interactive tool that requires limited data entry and allows you to easily manage, revise and publish specialty, catering and event menus in real-time.

Eliminate costly and time-consuming paper menus with a touchless option. Drive your guests to your eMenu with a custom URL or create your own QR code. eMenus for Hyatt allows you to put your food and beverage offerings front and center.

Highlights

VISUAL SELLING

Visually rich and fully interactive design, content, and imagery.

PROMOTION UPSELLS

Promote premium catering offers and food and beverage upsells.

HYATT-APPROVED

Brand-matched menu presentation via a mobile-friendly, custom URL.

CUSTOM FILTERS & TAGS

Create custom filters and tags to quickly view specific menu items, such as gluten-free or vegetarian options, and set up specific tags relevant to your food, such as local flavor and more.

REAL-TIME UPDATES

Manage menus with flexibility. No need to constantly update the PDF file on your corporate website. With eMenus, updates can be made in real-time with the click of a button.
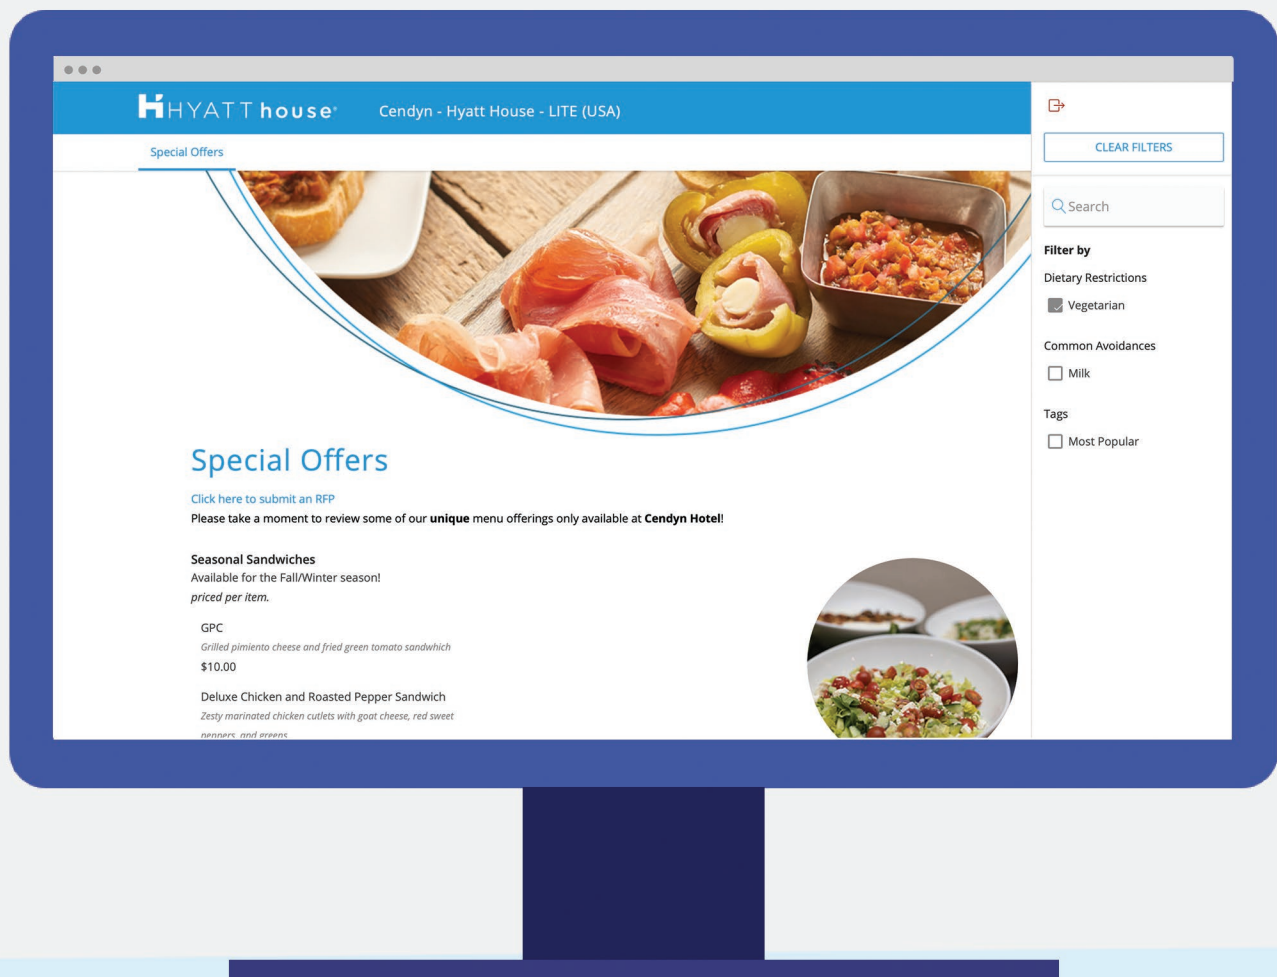

INTEGRATION WITH EPROPOSAL

Our seamless integration with eProposal allows you to include your menus within each sales proposal. Choose specific menu categories to include or filter with tags.

eMenus & Hyatt

Create and publish beautiful specialty, catering and event menus with ease. eMenus requires limited effort and minimal data entry so your staff can focus on delivering a seamless RFP experience.

eMenus allows you to customize and deliver menus based on dietary restrictions, most commonly viewed items and special offers. Impress your customers with a visually-inspiring digital experience.

eMenus & Hyatt

Manage specialty, catering and event menus with ease

FEATURES	EMENUS & HYATT
Real-time menu updates	Manage your menus with flexibility. Create and edit menus in real-time using a content management system (CMS) that allows for quick changes and the most up-to-date information to share with your sales and catering team. Publish your menus instantly online, and save time and money over paper menus.
eProposal integration	When sending your sales proposals, include custom menus that are tailored to your specific client with eMenu's eProposal integration.
Multi-language support	Multiple language options are supported with eMenus.
Menu sharing	Choose how you share specific menus and menu items with clients via email or PDF link.
PDF editor	Our intuitive PDF editor allows you to make on the fly adjustments to your online menus.
Find and replace functionality	Save time by personalizing and quickly updating your content with the find and replace feature.
Social media	Add links within your menus to drive guests directly to your social media pages.
Filters and tags	Add tags or filters to your menu items. Planners can easily filter for dietary restrictions such as gluten-free or vegetarian, and search by custom tags such as local flavor and more.
Mobile-friendly menus	Enjoy flexible, mobile-friendly menu options for catering, meetings, weddings and more.
User activity	Keep track of all updates made to your menus - who made the update, when and what they updated. Details can be exported in Excel format.
